

ANGLEMASTER 4000

Precision Bedknife Grinding

The Anglemaster 4000 was designed to match the speed, ease and accuracy of its Express Dual counterpart, grinding bedknives to within one thousandth of an inch.

The Anglemaster 4000 comes with our new SuperBlue grindstone as standard. Get more grinds for your money – SuperBlue can grind the hardest bedknives longer, harder and cooler.

New, upgraded 4000DXi comes standard with automatic infeed. Set the grinder up to grind and walk away to perform other tasks-infeed will grind to desired settings.

Mounting of bedknives is a simple, fluid process. The unique bedknife central grind position minimizes the occurrence of errors.

The fine tolerances and ability to produce any desired angle, ensures that the reel and bedknife work in perfect harmony.

- Simple to set up and use
- Grinds bedknives up to 40" long
- Operator panel with tactile colour coded function buttons
- Unique digital angle setting and readout of current and desired angles with auto-cue for simple operation
- Heavy-duty robust construction prevents flexing
- Improved safety enclosure — better dust and noise containment

ANGLEMASTER 4000 DXi

- Now upgraded with automatic infeed
- Powered mounting bar to any angle
- Auto stops at preset angles
- Digital electronic display
- Variable speed traverse
